# Fitting Connectors on HDF-200 and HDF-400 Cable

Strip the cable\*

Put the crimp sleeve onto the cable\*\* and pull the braiding back

Put the pin on the inner core and crimp the pin onto the inner core

Put the crimp plug onto the cable and flatten the braiding over the crimp plug

Pull the crimp sleeve over the crimp plug and crimp the crimp sleeve onto the crimp plug

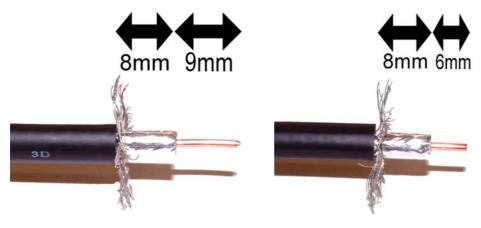

\*Note: When stripping HDF-400 check length of cuts when stripping (See Below).

\*\*Note: If putting connector boots on, slide them onto the cable before the crimp sleeve, and then slide the connector boot over the crimp plug after making the cable.
